EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, step (d), the first word, "maintaing" has been replaced with the correct spelling, "*maintaining*".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered the amendment and terminal disclaimer filed by applicants on December 19, 2006. The terminal disclaimer was sufficient to overcome the obviousness-type double patenting rejection made in the previous Office Action. Applicants' amendment and arguments were found persuasive. The examiner agrees that Smith et al (relied upon for rejection of record) relies on different reaction kinetics to control the amount of alcohol (desired product) produced by their process, said reaction does not render the instant claims obvious. Furthermore, the reference teaches a lower water to olefin ratio than recited in the instant claims, and fails to provide the requisite suggestion or motivation to increase said ratio to arrive at the corresponding limitation of the instant invention. Accordingly, the instant claims are now allowed.
